

PARK RELEASE EMERGENCY VALVE

The park release emergency valve (PREV) is used to conduct the control pressure to the TEBS-E Modulator. The PREV is equipped with a red actuating button for actuating the parking brake, as well as a further black actuating button for releasing the brake which is automatically actuated when the trailer vehicle is unhitched.

Key features

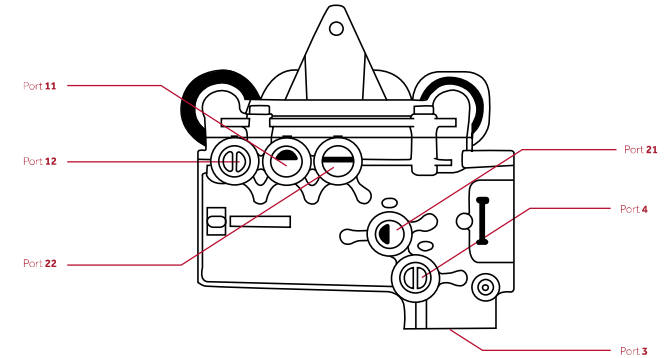

- This one base variant can replace the relevant variant available in the market, just to add the respective fitting and test connectors.
- Much longer lifetime and better corrosion resistance reduces the replacement rate of this component compared to other budget parts

FEATURE	OE ORIGINAL	PROVIA	AFTERMARKET AVERAGE*
Corrosion resistance (hours)			
Leakage -40 °C (cm³ / min)			
Leakage +65 °C (cm³ / min)			

* Average low specification alternative product
